Ben F. Maier — CV

⌂
Berlin DE
◍
benmaier.org
contact@benmaier.org
googlescholar.benmaier.org

I develop mathematical models of the world and software frameworks to learn from them. Experienced in setting up automated big-data analysis and processing solutions. Currently researching AI application solutions at PyMC Labs. Excellent technical and inter-personal communication skills. Team player. More than a decade of experience in renowned inter-disciplinary research with a PhD in theoretical physics and a broad interest in mechanistic modelling of interconnected systems. Advised the German government on model-informed mitigation strategies during the COVID-19 pandemic. Developed algorithmic investment strategies at Deutsche Bank.

Principal Data Scientist & AI Researcher

since 2026, *PyMC Labs*
R&D: Designing and developing synthetic consumer and agentic data science systems for simulation, experimentation, and decision support. AI Consulting: Advising clients across industries on applying AI and advanced statistical methods to real-world business problems. Product & Open Source Development: PyMC ecosystem and AI-powered data science applications.

IT Consultant & Developer

since 2025, *Self-employed*
Development of full-stack solutions for automated big data processing based on methods from statistical and mechanistic modelling as well as artificial intelligence. Specialized in Python incl. data stack, C++, JS and SQL dialects. Well-documented software packages with automated tests. Concise presentation of analysis insights.

Quantitative Strategist

2024, *Group Strategic Analysis, Deutsche Bank, Berlin*
Full-stack development and implementation of algorithmic investment products. Dev work in Python, JS, OracleDB, Matlab.

Postdoc & Deputy PI

2020–2023, *Robert Koch Institute, DTU Copenhagen, Danmarks Statistiks*
In Germany: Research focusing on epidemic spreading processes in human systems, mainly infectious disease modeling and data analysis regarding the COVID-19 pandemic. Supervising students and research projects. Reporting to crisis response panel and German ministry of health. Administrative tasks. Dev work in Python, C++, and JS. Administering web and database servers. In Denmark: Modeling of temporal network dynamics and big-data analyses of nation-scale social systems with machine-learning techniques and applications in infectious-disease modeling. Supervising students and independent research projects. Dev work in Python, C++, and JS.

Scientific Record

Publications	(co-)author of 26 articles (see section "Publications" below) Citations: 2063, h-index: 14
Grants	(co-)author of 3 successful grant applications (DFG & BMG)
Press	my work has been featured in the media more than 63 times (see section "Press Coverage" below)
Talks	presenter at 28 events (see section "Talks" below)
Software	developed more than 22 open-source libraries (see section "Open-Source Software" below)
Reviews	I reviewed manuscripts for PNAS, Science Advances, Communications Medicine, Physical Review X, PLOS Digital Health, PLOS ONE, Physical Biology, Physica A, Physical Review E, Nature Computational Science, JMIR Publich Health and Surveillance, and Journal of Complex Networks.
PhD Thesis	"Spreading processes in human systems", doi:10.18452/20950.

Education

2014–2019 **PhD in Theoretical Physics** *Humboldt University of Berlin, Robert Koch Institute*, final grade: *summa cum laude* (highest possible grade)

2011–2014 **MSc in Physics** *Humboldt University of Berlin*, final grade: 1.2, thesis: 1.0 (highest possible grade)

2011–2012 **Erasmus exchange program** *Universiteit Utrecht (NL)*, ten-month visit

2008–2011 **BSc in Physics** *Humboldt University of Berlin*, final grade: 1.7, thesis: 1.0 (highest possible grade)

2008 **Abitur (German high school diploma)** *Berlin*, final grade: 1.2, intensive courses: physics, computer science

Additional Work Experience

2015–2022 **Data Scientist** *Self-employed, customers incl. Universal Music Germany, Santa Fe Institute*, Big data applications, custom research, automated solutions

2018–2019 **Full-Stack Developer** *Robert Koch Institute*, Fullstack dev web app

2010–2011 **Student Assistant** *Institute for Scientific Instruments (Berlin-Adlershof)*, Software development (C++)

2010 **Research Intern** *HU Berlin, Department of Physics, Group "PHÄ"*, Research internships in lattice gauge theory

Teaching

2016–2023 **Co-Supervisor** *RKI, HU Berlin & DTU*, co-supervision of several Master and PhD students

2018 **Teaching Assistant** *Santa Fe Insitute*, “introduction to Dynamical Systems” on the MOOC-platform “Complexity Explorer”

2016 **Teacher** *Deutsche SchülerAkademie*, three-week course on “Network Science and Complex Systems” in a summer school for gifted high-school students

2013–2014 **Teaching Assistant** *Department of Physics (HU Berlin)*, course: “Classical Mechanics and Introduction to Thermodynamics”

2013 **Teacher** *Student association physics (HU Berlin)*, lectures in a prep course for the course “Computational Physics”

2010–2011 **Teaching Assistant** *Charité (joint Department of Medicine HU Berlin & FU Berlin)*, introductory lab class in physics for freshmen in medicine

2009 **Teacher** *Student association physics (HU Berlin)*, lectures in a prep course for freshmen in physics

Fellowships & Awards

2023 Research Environment of the Year (Danish Young Academy)

2019–2023 Add-on Fellow for Interdisciplinary Life Science of the Joachim Herz Stiftung

2014 HU Berlin Research Track scholarship

2011–2014 Fellow of the German National Academic Foundation (Studienstiftung des Deutschen Volkes) including scholarship

2008 Award for excellent performance in the Abitur exam (Deutsche Physikalische Gesellschaft)

2007 Award for excellent performance in the physics intensive course (Deutsche Physikalische Gesellschaft)

Theses

2019 Spreading Processes in Human Systems (PhD), doi:10.18452/20950.

2014 Thermophoresis in Liquids and its Connection to Equilibrium Quantities (MSc), doi:10.18452/21036.

2011 Simulations of Dyon Configurations in SU(2) Yang-Mills Theory (BSc), doi:10.18452/21035.

Technical Skill Set

Scientific	numpy, scipy, polars, pandas, geopandas, pytorch, scikit-learn, Matlab, Mathematica, Sun Grid Engine
Development	Python, C++, JavaScript, bash, various SQL dialects, AWS, git, CI, Perforce, Java
OSes	Linux incl. server administration (Ubuntu, Red Hat, CentOS), Mac OSx, Windows
Web	JavaScript (incl. d3.js, Three.js, p5.js), HTML, CSS, django
APIs	Twitter, Spotify, Wikipedia
Office	LaTeX, MS Word, MS Excel, Keynote, Pages
Graphic design	Affinity Designer, Affinity Photo, Autodesk Graphic, Gimp, InkScape
Audio & Music	Ableton Live 11, Maschine 2, Reason 8, Audacity, Foxdot, Sonic Pi

Languages

German	mother tongue
English	fluent (TOEFL-certified)
French	basic (level A2)

Schools

2015–2019 **Member of the HU Berlin IRI Life Sciences Graduate School** *Berlin*

2018 **Complex Systems Summer School** *Santa Fe Institute*

2017–2018 **Specialization "Deep Learning"** *coursera.org*

2015 **Seminar "Time-Management"** *Humboldt Graduate School Berlin*

2015 **Member of the Humboldt Graduate School** *Berlin*

2015 **Complex Networks: Theory, Methods and Applications** *Lake Como School of Advanced Studies in Complex Systems*

Publications

2025 **LLMs Reproduce Human Purchase Intent via Semantic Similarity Elicitation of Likert Ratings**, B. F. Maier*, U. Aslak, L. Fiaschi, N. Rismal, K. Fletcher, C. C. Luhmann, R. Dow, K. Pappas*, T. V. Wiecki
arXiv. doi:10.48550/arXiv.2510.08338.

Large-scale wearable data reveal spatiotemporal organization of annual sleep patterns, A. H. Rose*, H. Schenk, B. F. Maier, D. Brockmann, E. C. Winnebeck
bioRxiv. doi:10.1101/2025.08.03.668323 .

Demography-independent behavioural dynamics influenced the spread of COVID-19 in Denmark, L. Meynent*, M. B. Petersen, S. Lehmann, B. F. Maier*
arXiv. doi:10.48550/arXiv.2503.11455.

Decoupling geographical constraints from human mobility, L. Boucherie*, B. F. Maier, S. Lehmann
Nature Human Behaviour. doi:10.1038/s41562-025-02282-7.

Unveiling the Social Fabric: A Temporal, Nation-Scale Social Network and its Characteristics, J. Cremers*, B. Kohler*, B. F. Maier*, S. N. Eriksen, J. Einsiedler, F. K. Christensen, S. Lehmann, D. D. Lassen, L. H. Mortensen, A. Bjerre-Nielsen
Nature Scientific Reports. doi:10.1038/s41598-025-98072-2.

2024 **Inferring country-specific import risk of diseases from the world air transportation network**, P. Klamser*, A. Zachariae, B. F. Maier, O. Baranov, C. Jongen, F. Schlosser, D. Brockmann
PLOS Comp. Bio.. doi:10.1371/journal.pcbi.1011775.

2023 **Maximum-likelihood fits of piece-wise Pareto distributions with finite and non-zero core** , B. F. Maier*
arXiv. doi:10.48550/arXiv.2309.09589.

Enhancing global preparedness during an ongoing pandemic from partial and noisy data, P. Klamser, V. d'Andrea, F. Di Lauro, A. Zachariae, S. Bontorin, A. Di Nardo, M. Hall, B. F. Maier*, L. Ferretti, D. Brockmann, M. De Domenico
PNAS Nexus. doi:10.1093/pnasnexus/pgad192.

Estimating the share of SARS-CoV-2-immunologically naïve individuals in Germany up to June 2022, B. F. Maier*, A. H. Rose, A. Burdinski, P. Klamser, H. Neuhauser, O. Wichmann, L. Schaade, L. H. Wieler, D. Brockmann
Epidemiology & Infection. doi:10.1017/S0950268823000195.

Modeling the impact of the Omicron infection wave in Germany, B. F. Maier*, A. Burdinski, M. Wiedermann, M. an der Heiden, T. Harder, O. Wichmann, F. Schlosser, D. Brockmann
Biology: Methods & Protocols. doi:10.1093/biomethods/bpad005.

2022 **Germany's fourth COVID-19 wave was mainly driven by the unvaccinated**, B. F. Maier*, M. Wiedermann, A. Burdinski, P. Klamser, M. A. Jenny, C. Betsch, D. Brockmann
Nature Communications Medicine. doi:10.1038/s43856-022-00176-7.

Understanding the impact of digital contact tracing during the COVID-19 pandemic, A. Burdinski*, D. Brockmann, B. F. Maier*
PLOS Digital Health. doi:10.1017/S0950268823000195.

Evidence for positive long-and short-term effects of vaccinations against COVID-19 in wearable sensor metrics–Insights from the German Corona Data Donation Project, M. Wiedermann*, A. H. Rose., B. F. Maier, Jakob J. Kolb, D. Hinrichs, D. Brockmann
arXiv. arXiv:2204.02846.

2021 **epipack: An infectious disease modeling package for Python**, B. F. Maier*
Journal of Open Source Software. doi:10.21105/joss.03097.

Potential benefits of delaying the second mRNA COVID-19 vaccine dose, B. F. Maier*, A. Burdinski, A. H. Rose, F. Schlosser, D. Hinrichs, C. Betsch, L. Korn, P. Sprengholz, M. Meyer-Hermann, T. Mitra, K. Lauterbach, D. Brockmann
arXiv. arXiv:2102.13600.

2020 **Effective containment explains subexponential growth in recent confirmed COVID-19 cases in China**, B. F. Maier*, D. Brockmann
Science. doi:10.1126/science.abb4557.

COVID-19 lockdown induces structural changes in mobility networks — Implication for mitigating disease dynamics, F. Schlosser*, B. F. Maier, D. Hinrichs, A. Zachariae, D. Brockmann
PNAS. doi:10.1073/pnas.2012326117.

Thresholding normally distributed data creates complex networks, G. T. Cantwell*, Y. Liu, B. F. Maier*, A. C. Schwarze, C. A. Serván, J. Snyder, G. St-Onge
Phys. Rev. E. doi:10.1103/PhysRevE.101.062302.

Commentary: A network science summer course for high school students, F. Klimm*, B. F. Maier*
Network Science. doi:10.1017/nws.2020.12.

Combining clinical epidemiology, NGS-based analysis and modeling approaches to reveal transmission dynamics of vancomycin-resistant enterococci in a high risk population within a tertiary care hospital, B. Neumann*, J. K. Bender, B. F. Maier, A. Wittig, S. Fuchs, T. Semmler, D. Brockmann, H. Einsele, S. Kraus, L. H. Wieler, U. Vogel, G. Werner
PLOS ONE. doi:10.1371/journal.pone.0235160.

2019 **Netwulf: Interactive visualization of networks in Python**, U. Aslak*, B. F. Maier*
Journal of Open Source Software. doi:10.21105/joss.01425.

Generalization of the small-world effect on a model approaching the Erdős-Rényi random graph, B. F. Maier*
Nature Scientific Reports. doi:10.1038/s41598-019-45576-3.

Modular hierarchical and power-law small-world networks bear structural optima for minimal first passage times and cover time, B. F. Maier*, C. Huepe, D. Brockmann
Journal of Complex Networks. doi:10.1093/comnet/cnz010.

2017 **Cover time for random walks on arbitrary complex networks**, B. F. Maier*, D. Brockmann
Phys. Rev. E. doi:10.1103/PhysRevE.96.042307.

2013 **Application of Ewald's Method for Efficient Summation of Dyon Long-Range Potentials**, B. Maier*, F. Bruckmann, S. Dinter, E. M. Ilgenfritz, M. Müller-Preußker, M. Wagner
PoS Confinement. doi:10.22323/1.171.0051.

2012 **Confining dyon gas with finite-volume effects under control**, F. Bruckmann*, S. Dinter, E. M. Ilgenfritz, B. Maier, M. Müller-Preußker, M. Wagner*
Phys. Rev. D. doi:10.1103/PhysRevD.85.034502.

Talks

2026 **Agentic Data Science** PyMC Labs Public Workshop Series, *PyMC Labs (online)*

2024 **Be water, my friend: Urban structure and human mobility through the lens of soft matter theory** Add-on fellow meeting Joachim Herz Foundation, *Joachim Herz Foundation, Hamburg*

2023 **Mobility and the spread of infectious diseases** Guest lecture “Fighting Infectious Diseases”, *DTU*

2022 **COVID-19: Is simpler better?** COVID Crisis Lab – Seminar Series (invited), *Bocconi University Milan (online presentation)*

Mobility and the spread of infectious diseases Guest lecture “Fighting Infectious Diseases”, *DTU*

Modeling COVID-19 at RKI Statistics/R-Seminar (invited), *Robert Koch Institute (online presentation)*

Infectious-disease models: Types and theory Summer School “Modellierung schwerer Infektionskrankheiten” (invited), *University of Halle*

The role of complexity science and mathematical modeling in fighting the pandemic Ising Lectures 2022 (invited), *ICMP NAS of Ukraine, Lviv (online presentation)*

2021 **Fighting the pandemic with complexity science** Davis Complexity Group Seminar (invited), *UC Davis (online presentation)*

Temporal networks, modeling infectious diseases, interactive visualizations, and other fancy buzzwords: Three Python packages that might make your life easier Networks 2021, HONS2021 Satellite (invited), *Washington, D.C. (online presentation)*

2020 **Epidemiologische Modelle sind was für die Profis - oder?** SciCAR conference, *Technical University of Dortmund (online presentation)*

Signaling on modular hierarchical and other small-world networks NetSci, *Rome (online presentation)*

Misconceptions of spreading processes in sparse temporal networks PIK, RD4 seminar series, *Potsdam*

2019 **Epidemic spreading on face-to-face temporal networks** SFI Seminar series, *Santa Fe*

Flockworks: A class of dynamic network models for face-to-face interactions CompleNet, *Tarragona*

Tacoma: A C++/Python package for temporal network analysis CompleNet, *Tarragona*

2018 **Flockworks: A class of dynamic network models for face-to-face interactions** Conference on Complex Systems, *Thessaloniki*

When you're sick, please stay at home—Making sense of spreading phenomena using human mobility and contact data "idalab" company seminar (invited), *Berlin*

Flockworks: A class of dynamic network models for face-to-face interactions DPG Spring Meeting, *Berlin*

2017 **Flockworks: A class of dynamic network models for face-to-face interactions** Group seminar DTU COMPUTE, *Copenhagen*

Influence of group-structured network topologies on dynamical processes Princeton-Humboldt cooperation workshop CoCCoN, *Princeton*

2016 **Influence of group-structured network topologies on dynamical processes** "Biophysics and Evolutionary Dynamics" Gruppenseminar UC Berkeley, *Berkeley*

Flockworks: A class of dynamic network models for face-to-face interactions NetSci, *Seoul*

Flockworks: A class of dynamic network models for face-to-face interactions Network Journal Club, *Oxford*

2015 **Modular hierarchical random networks—Topology and Dynamics** NetSci, *Zaragoza*

2012 **Application of Ewald's Method for Efficient Summation of Dyon Long-Range Potentials** Confinement X, *Munich*

Confining dyon gas with finite-volume effects under control DPG Spring Meeting, *Göttingen*

2011 **Simulations of dyon configurations in SU(2) Yang-Mills theory** DPG Spring Meeting, *Karlsruhe*

Open-Source Software

- **decision-lab**, Automated AI research system with multiple agents running in parallel., github.com/pymc-labs/decision-lab
- **epipack**, Build epidemiological models for analytical and numerical analyses as well as network simulations, github.com/benmaier/epipack
- **netwulf**, Interactive visualizations of networks, github.com/benmaier/netwulf
- **tacoma**, C++ and Python package for the analysis and simulation of temporal networks in continuous time, github.com/benmaier/tacoma
- **ljhouses**, Simulate various two-dimensional single-atom systems to analyze similarity to urban structure (molecular dynamics and custom simulations), github.com/benmaier/ljhouses
- **vaccontrib**, Compute the contributions of infection pathways between vaccinated and unvaccinated individuals to infectious-disease outbreaks, github.com/benmaier/vaccontrib
- **regnet**, Construct large-scale temporal networks from registry data and analyze shortest-path lengths, https://doi.org/10.5281/zenodo.13642948

- **fincoretails**, Fit a bunch of distributions with finite core and heavy tails to data, github.com/benmaier/fincoretails
- **cQuadTree**, C++/Python-package to construct and query quad trees/Barnes-Hut trees, github.com/benmaier/cQuadTree
- **submitex**, CLIs to make your LaTeX-manuscript ready for journal submission, github.com/benmaier/submitex
- **cMHRN**, fast creation of modular-hierarchical, power-law, and regular small-world networks, github.com/benmaier/cMHRN
- **QSuite**, a command-line interface for efficient management and analysis of simulations on compute clusters, github.com/benmaier/qsuite
- **binpacking**, optimal distribution of weights to containers, github.com/benmaier/binpacking
- **EffectiveDistance**, computing the effective distance of spreading processes in transport networks, github.com/benmaier/effective-distance
- **RadialDistanceLayout**, radial visualization of a shortest-path tree with respect to the effective distance, github.com/benmaier/radial-distance-layout
- **NetworkProperties**, collection of useful network analysis methods, github.com/benmaier/network-properties
- **nwDiff**, Python package for the simulation and analysis of diffusion processes in complex networks, github.com/benmaier/nwDiff
- **cNetworkDiff**, C++-based packaged for the simulation and analysis of diffusion processes in complex networks, github.com/benmaier/cNetworkDiff
- **fisheye**, JavaScript library for local magnification of data in visualizations, github.com/benmaier/fisheye, see also: beta.observablehq.com/@benmaier/a-visually-more-appealing-fisheye-function
- **GTOM**, Python package for computing the "general topological overlap measure" of potentially very large networks, github.com/benmaier/GTOM
- **species-overlap**, Fast evaluation of incidence- and abundance-based species overlap measures, github.com/benmaier/species-overlap
- **quasispycies**, Classes to compute the stable equilibrium of the quasispecies-equation on complex networks, github.com/benmaier/quasispycies
